

MASTER RX DESCRIPTION

- ◆ Master Prescriptions are used to clarify doctor's specifications, which may be different from Great Lakes Standards.
- ◆ There is no limit to the number of Master Prescriptions you can have. They are set up by appliance design and each have their own identification number.

If you are interested in this program you have two options to get started.

1. You can fill out an example prescription with all specifications noted, as many different designs as you need or wish.
2. We can have a Designer call you to go over your specifications and begin the process this way.

Once these specifications are completed we will prepare a formal prescription with illustration and send it to you to review and approve.

Once you review our prescription for corrections, **the yellow copy is for your records.** Please return the white copy in the enclosed envelope at your earliest convenience.

From that point forward, you need only to print your name, address, patient's name, date needed and Master Prescription Number of your prescription and we will do the rest. Should you wish to deviate from the design, please mark the individual prescription clearly. To update your Master Prescription please feel free to contact Lab Customer Service and a revision will be processed promptly.

Once again, thank you for your time and if we may be of further assistance feel free to contact Lab Customer Service at 1-800-828-7626 ext. 132.
