

INFORMATION TO MAXIMIZE THE POTENTIAL OF YOUR BIOSTAR® OR MINISTAR®

Thermal Forming Material and Applications Chart

Great Lakes has created an easy-to-use chart of all the thermal forming sheet material.

It is divided up into four sections:

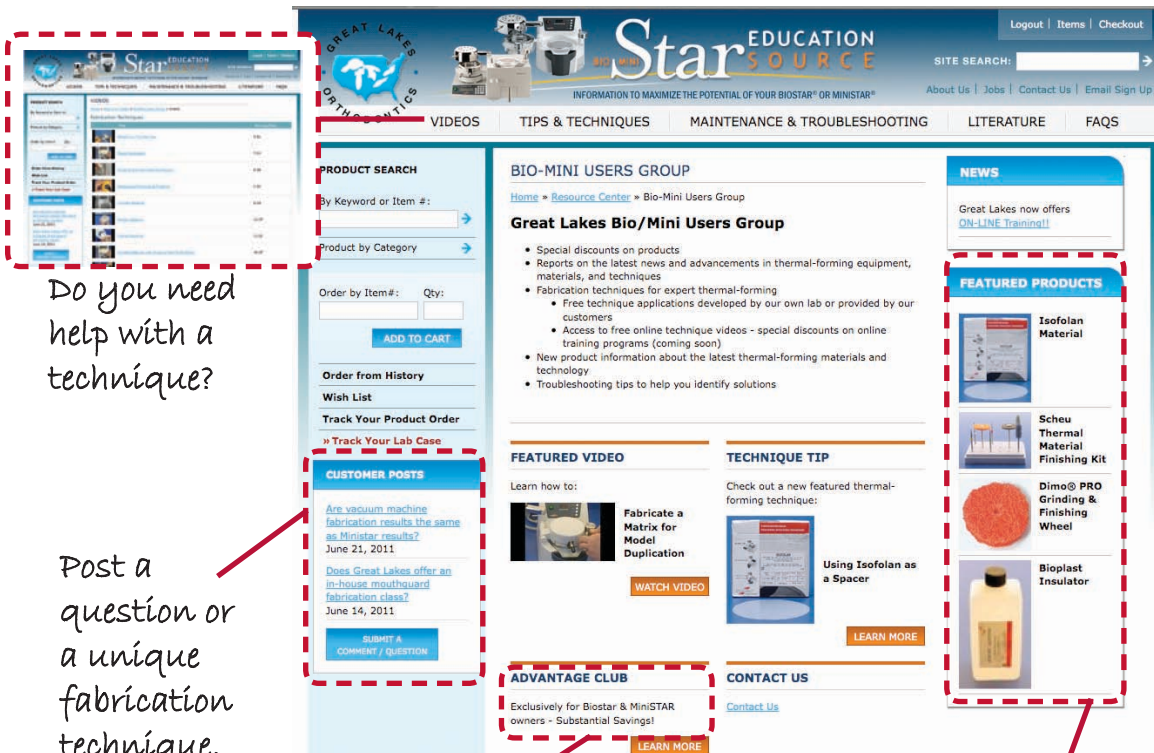

- Clear Material: Pgs. 1-4
- Colored / Patterned Retainer Material: Pgs. 5-6
- Multi-Colored Mouthguard Material: Pg. 7
- Colored Mouthguard Material: Pgs. 8-9

The chart lists material sizes, item nos., and quantities. It also includes a description of each material and the appropriate applications.

You can download the chart from the Bio/Mini Users site or contact us and we will be happy to send it to you.

Don't forget to tell your patients about DentaSOAK®

DentaSOAK is ideal for patients with retainers, appliances, mouthguards, or dentures. It's easy, fast, and effective.

DentaSOAK kills more than 99% of infection-causing bacteria in just 15 minutes. In fact, it's clinically proven to destroy stubborn candida albicans and other oral microbes that can lead to painful, recurring oral infection.

Patients can order DentaSOAK through you or on-line: www.dentasoak.com
