A helpful guide to orthodontic concepts and pre-restorative tooth movement using micro implants.

Features information for General Practitioners on:

- Using micro implants
- Molar uprighting
- Placement/removal process
- Extrusion methods
- Biomechanics made simple
- Clinical case profiles

- Provides a general overview of adjunctive pre-restorative Minor Tooth Movement [MTM] without bracket appliances.

- Details various techniques and procedures for achieving MTM and alignment through micro implant anchorage.

- Offers General Practitioners favorable pre-restorative treatment alternatives for their patients either in-house or by orthodontic referral.
