

# GREAT LAKES IS YOUR SLEEP SOLUTIONS PARTNER

## Confidently treat your patients with sleep disordered breathing

**Nylon Sleep Herbst®\***

\*Herbst is a registered trademark of Dentaaurum, Inc.

The Nylon Sleep Herbst®, featuring an aesthetically favorable white medical-grade nylon, is an extremely durable and strong appliance that also offers uniquely flexible properties.

**Hard Telescopic Herbst®\***

\*Herbst is a registered trademark of Dentaaurum, Inc.

This appliance allows patients some lateral and vertical movement without disengaging the appliance. If the initial position does not provide anticipated relief, the mandible can easily be moved forward in small increments.

**Custom flexTAP® Appliance**

The new flexTAP® is the first custom oral appliance to include a standard nasal breathing component, the flexTAP Mouth Shield, to improve comfort and treatment outcomes.

**dreamTAP™ Appliance**

The ultra comfortable dreamTAP™ appliance is designed with hardware on its exterior, offering greater tongue space with no obstructions. With more tongue space, patients experience greater comfort and a healthier sleep.

**EMA Sleep Appliance**

Ideal for the treatment of snoring and mild to moderate sleep apnea, and in cases where CPAP has been ineffective or not easily tolerated by the patient.

**Panthera Classic (D-SAD™)**

The fully CAD/CAM Panthera Classic is made from biocompatible polyamide medical grade nylon. Unique rod connection points ensure that the device will not disengage during sleep, elongate or distort.

**Panthera X3™**

The next generation dorsal fin sleep appliance—one of the smallest, lightest and most durable sleep appliances available.

# GREAT LAKES IS YOUR SLEEP SOLUTIONS PARTNER

## Confidently treat your patients with sleep disordered breathing

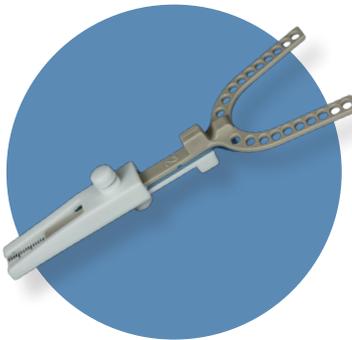

**Nonin WristOx<sub>2</sub>® 3150  
Wrist-worn Pulse Oximeter**

The WristOx<sub>2</sub>® 3150 Starter Kit from Nonin is the most versatile wrist-worn pulse oximeter for unmatched performance and value. The WristOx<sub>2</sub> delivers proven accuracy and convenience in the widest range of patient populations and settings.

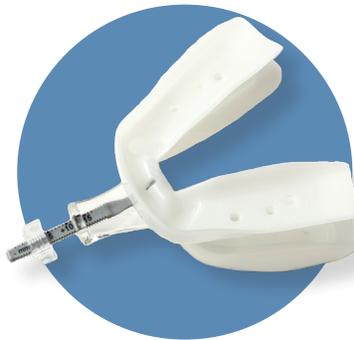

**SleepSat 3-D  
Hi-Res Oximeter**

The SleepSat 3-D Hi-Res Oximeter uses high sampling rate and precise signal resolution to track small changes and short-cycle fluctuations, allowing SatScreen to report on enhanced patterns found in subtle and complex forms of sleep-disordered breathing.

**The George Gauge®**

Ideal for mandibular repositioning, this allows the clinician to capture the protrusive bite registration and vertical opening without relying on the patient to achieve proper positioning, eliminating guesswork.

**myTAP™ Appliance**

myTAP™ is a precision-fit oral appliance intended to reduce or alleviate nighttime snoring and obstructive sleep apnea (OSA).

**MediByte® Lite Kit**

The MediByte® Lite Kit is a 12-Channel, Level 3 Home Sleep Screener capable of recording snore decibels with audio, in addition to oral facial movement (OFM) and snoring volume.
